

K&K

Education & Institutional Development

Building institutions, capability and partnerships for long-term impact.

Overview

K&K supports education providers, government entities, investors and organisations developing learning, training and workforce-capability initiatives in the UAE and internationally.

Our perspective combines institutional leadership, applied education, technology, executive development and public-private partnership experience. We help clients move from an ambition or partnership opportunity to a clear institutional model, implementation plan and network of relevant academic, government and industry stakeholders.

What We Do

Institutional Strategy & Development

Support in defining institutional purpose, strategic priorities, operating model, governance considerations, growth direction and implementation roadmap for new or evolving education and training organisations.

Programme & Portfolio Strategy

Review and development of programme portfolios aligned with learner needs, workforce demand, industry priorities and institutional positioning. Academic approval, accreditation and quality assurance remain with the relevant institution and specialist authorities.

Workforce Development & Applied Learning

Design of training and capability-building initiatives that connect education with employment, organisational performance and national workforce priorities.

Executive Education & Leadership Development

Development and coordination of executive learning, leadership programmes, professional education and sector-specific training in partnership with qualified academic and delivery organisations.

University, Government & Industry Partnerships

Identification and development of collaborations between universities, government entities, employers, research centres, technology providers and international institutions.

Innovation, Entrepreneurship & Incubation

Support for innovation centres, entrepreneurship programmes, applied research partnerships, incubators and initiatives that help ideas move from education into commercial or societal application.

Digital Learning & AI in Education

Strategic support for technology-enabled education, AI literacy, digital-learning transformation and the responsible integration of emerging tools into teaching, administration and institutional decision-making.

International Market Entry & Collaboration

Support for education and training organisations evaluating entry into the UAE or seeking regional partnerships, including opportunity assessment, stakeholder mapping, partnership development and local coordination.

Institutional Review & Advisory

Independent review of strategy, structure, partnerships, programme relevance and delivery priorities, translated into practical recommendations and an agreed action plan.

How We Work

K&K can undertake a defined strategic review, support the development of a programme or partnership, or provide continuing advisory and stakeholder coordination. Academic, accreditation, licensing and regulatory responsibilities remain with the institution and appropriately appointed specialists.

Scope & Professional Boundaries

K&K provides strategic, commercial and implementation support within an agreed mandate. Where specialist technical, legal, regulatory, financial or licensed professional services are required, these remain with appropriately qualified advisers and delivery partners.

Leadership & Relevant Experience

H.E. Dr. Tayeb Kamali

Co-Founder & Chairman

Dr. Kamali is one of the UAE's established leaders in higher education, applied research, training and institutional development. He previously served as Vice Chancellor of the Higher Colleges of Technology, the UAE's federal applied higher-education system, and was the founding Group Chief Executive of the Centre of Excellence for Applied Research and Training, its commercial and training arm.

Across these roles, he helped develop education, professional training, applied technology and industry-partnership initiatives at national and regional scale. His experience includes workforce-development collaborations with government entities, international academic relationships, technology-enabled learning and the development of education models designed around economic and employment needs.

He currently chairs the Board of Trustees of the Abu Dhabi School of Management, supporting its direction in entrepreneurship, leadership, innovation, sustainability, business analytics and AI-related management education. This depth of experience provides K&K with a credible foundation for institutional strategy, partnership development and education-led transformation.

Positioning Note

This experience belongs to Dr. Kamali's career across government, education, investment and institutional partnerships. It informs K&K's capability and network; it should not be described as work previously delivered by K&K unless the relevant engagement was contracted through K&K.
