

WEBSITE-READY COPY

K&K Hospitality

Final copy for the Hospitality section of the wider K&K website.

tone

Direct, experienced and human. Broad enough for restaurants, cafes, food and beverage venues within hotels, malls, mixed-use destinations and selected international opportunities.

We invest with an operator's understanding - and operate with an owner's mindset.

We invest in, develop, open and operate hospitality concepts.

We know hospitality from both sides

K&K Hospitality brings together ownership, investment, culinary experience, restaurant development and day-to-day operations.

We are developing our own venues, starting with Kohantei at The Galleria Abu Dhabi. We also work with owners, investors, developers, landlords and hospitality businesses that need experienced support to assess an opportunity, develop a concept, open a venue or manage an existing operation.

Our focus is not limited to one format. We are open to restaurants, cafes, food and beverage venues within hotels, mall-based concepts, mixed-use destinations and the right opportunities in the UAE, across the GCC and internationally.

The format may change. The principles do not. The concept must make sense for its market, the commercial structure must be workable and the operation must be built properly.

What we want to build

Our ambition is to build a focused portfolio of hospitality businesses through direct ownership, investment partnerships, joint ventures, management agreements and selected operating opportunities.

We are not interested in collecting concepts for the sake of appearing bigger. We would rather be closely involved in a smaller number of venues where we understand the product, the numbers, the people and the guest experience.

Where we can be involved

- Restaurants and destination dining
- Cafes and more accessible everyday concepts
- Restaurants, cafes, bars and other food and beverage venues located within hotels
- Hospitality concepts within malls and mixed-use developments
- Partnerships with owners, investors, landlords and developers
- International brands entering the UAE or GCC
- Regional concepts considering international expansion
- Existing venues that need repositioning, stronger controls or experienced management

OUR FIRST VENUE

Kohantei

Kohantei is the first restaurant being developed under K&K Hospitality. It is currently in development and pre-opening at The Galleria Abu Dhabi.

For us, Kohantei is more than a name in a portfolio. It is the first full example of how we want to work - from the original opportunity and commercial discussions through development, opening and operation.

Securing and progressing the location

K&K has been closely involved in securing the opportunity and moving the project forward with the landlord and the wider project team.

Our work has included:

- Reviewing the opportunity and its commercial potential
- Negotiating and coordinating rent and lease-related matters
- Negotiating the landlord capital contribution
- Clarifying landlord and tenant responsibilities
- Maintaining direct liaison with the landlord
- Coordinating decisions, dependencies and project priorities
- Representing the operational needs of the restaurant during development
- Preparing the team, systems and operating structure for opening

Commercial details published on the website will remain limited to information K&K is permitted to disclose.

From development to operation

Kohantei is not being developed simply to reach an opening date. The work is being done with the intention of operating the restaurant properly after opening.

Until Kohantei officially opens, we will describe it as being in development and pre-opening. Once it is trading, the website can be updated to present it as the first operating restaurant within K&K Hospitality.

Hospitality consultancy, development and management

The same owner and operator thinking used in our own projects is available to selected clients.

We can become involved at the beginning of an idea, during development, before opening or after a venue is already operating. The role depends on what the owner needs and how much responsibility K&K is expected to take.

Strategy, positioning and feasibility

Before committing significant time and capital, we help the owner understand whether the opportunity makes sense and how it should be approached.

This can include the market, location, audience, concept positioning, commercial assumptions, operating model and the practical requirements behind the idea.

Concept and restaurant development

We help turn the idea into a restaurant or hospitality concept that can actually be built and operated.

This may cover the operating brief, guest journey, service model, restaurant flow, kitchen and operational requirements, equipment priorities, opening budgets and coordination with appointed designers and specialists.

Pre-opening and launch

Opening preparation is where many projects become rushed and disconnected. We bring the workstreams together and keep the operation at the centre of the process.

Our involvement may include the pre-opening plan, manpower, recruitment, operating procedures, suppliers, systems, training, budgets, opening inventories, readiness reviews and soft-opening support.

Support after the doors open

Operations and commercial performance

For an operating venue, we look beyond surface-level sales. We review how the business is being managed and where commercial or operational attention is required.

This may include revenue, food and beverage cost, labour, purchasing, inventory, menu performance, service standards, guest feedback, reporting and management accountability.

Owner representation

Not every owner wants or is able to remain inside every project discussion. We can represent the owner's interests across agreed commercial, development and operating matters.

The role may include landlord liaison, coordination with appointed consultants, monitoring key decisions and dependencies, reviewing progress and providing the owner with a clear and independent view of the project or operation.

Restaurant and venue management

Where K&K accepts a management appointment, we take a direct role in running the business under an agreed structure of authority and accountability.

This may include leadership, budgeting, financial controls, people management, purchasing, service standards, commercial reporting and the day-to-day operation of the venue.

A management appointment is different from consultancy. It involves continuing responsibility for the business, not only advice or a set of project deliverables.

Market entry and expansion

We are open to working with hospitality brands entering the UAE or GCC, as well as regional concepts considering expansion into other markets.

Our role may include assessing the opportunity, local positioning, operating requirements, development planning, pre-opening and implementation. Legal, tax, franchise documentation and authority approvals remain with the appropriate appointed professionals.

LEADERSHIP

Two perspectives, one business

K&K Hospitality is led by Mohamed Kamali and Mihai Giurebe. Their backgrounds are different, and that is exactly the value of the partnership.

Mohamed Kamali

Managing Director | Investment and Hospitality Development

Mohamed brings the perspective of an owner and investor, but his understanding of hospitality is not only financial.

He previously worked as a chef in Los Angeles under a renowned Michelin-starred chef. That experience gave him a hands-on understanding of kitchen discipline, product quality, culinary standards and the work required behind the scenes to deliver a strong guest experience.

At K&K, Mohamed is involved in assessing opportunities, investment strategy, commercial structure, concept positioning, culinary relationships and long-term development. He is closely involved in Kohantei from both the ownership and concept side of the business.

Mihai Giurebe

General Manager | Hospitality Operations and Development

Mihai brings extensive restaurant development and operating experience from the UAE and GCC.

His experience includes leading teams of more than 100 employees, developing and opening premium restaurant concepts in Dubai, and leading a major restaurant opening that received Michelin Opening of the Year recognition.

He currently leads the development and pre-opening of Kohantei at The Galleria Abu Dhabi, including project coordination, landlord liaison, operating requirements, team development, systems and opening readiness.

How the partnership works

Mohamed looks at the opportunity as an investor, owner and someone who has worked inside a professional kitchen. Mihai looks at how the concept will be developed, opened, staffed, controlled and operated every day.

Together, they can follow the full journey - from the first discussion and investment decision to opening, operation and future growth.

OUR MARKET

Based in the UAE, open to the right opportunity

The UAE is our home market. We understand its landlords, developers, investment environment, operating conditions and the expectations of a very diverse guest base.

Our immediate focus is the UAE and GCC, but we are not closing the door on international opportunities. The right partnership, concept or location can be considered wherever K&K can bring genuine value and remain properly involved.

We also understand that a restaurant in Abu Dhabi, a cafe in a shopping mall, a food and beverage venue inside a hotel and an international brand entering the region cannot be approached in the same way. Each opportunity needs to be understood on its own terms.

Ways to work with K&K

Investment or partnership

For selected opportunities where K&K may invest, partner, develop or operate.

Consultancy

For a defined review, decision, commercial question or area of specialist hospitality support.

Development and pre-opening

For a new venue that needs practical leadership from concept development through opening preparation.

Owner representation

For owners who need experienced oversight, coordination and clear reporting across a project or operating business.

Management

For venues requiring direct operating leadership under an agreed management structure.

Start a conversation

If you are considering a hospitality investment, developing a new concept, preparing a venue for opening or looking for an experienced operating partner, speak with us about the opportunity and where you need support.
