

K&K

UAE Investment & Real Estate Advisory

Local perspective. Commercial discipline. Trusted access.

Overview

K&K supports private investors, business owners and international partners exploring opportunities in the UAE. We provide local market perspective, commercial screening, structured coordination and access to an established network of licensed and specialist professionals.

Our purpose is to help clients approach opportunities with clearer information, realistic assumptions and the right local support. We do not replace licensed brokers, valuers, legal advisers, tax advisers, financial advisers or other regulated professionals. We help the investor coordinate them and keep the wider commercial objective in view.

What We Do

Investor Requirements & Market Orientation

Clarification of the investor's objectives, time horizon, preferred sectors or property types, expected involvement, budget parameters and risk considerations, followed by an introduction to the relevant UAE market and operating context.

Opportunity Screening

Initial commercial review of presented opportunities, including location, positioning, sponsor or developer profile, demand assumptions, proposed commercial terms, operating considerations and evident risks.

Commercial Assessment & Scenario Review

Coordination of financial assumptions, cash requirements, operating considerations and scenario comparisons to help the client understand the commercial logic behind an opportunity. Formal valuation, investment advice and regulated financial analysis remain with appointed professionals.

Real Estate & Hospitality-Led Opportunities

Support for investors considering residential, commercial, mixed-use or hospitality-related opportunities, with particular strength where property, business operations and destination potential must be considered together.

Partner & Adviser Introductions

Introductions to licensed brokers, developers, legal advisers, banks, tax advisers, valuers, technical consultants, property managers and other relevant specialists according to the mandate.

Due-Diligence Coordination

Development of an information checklist, coordination of advisers and tracking of key commercial, legal, financial and technical questions so that material issues are visible before a decision is taken.

Investor Representation & Project Coordination

Ongoing coordination on behalf of the client through evaluation, negotiation support, adviser management and implementation, without undertaking activities reserved for licensed professionals.

Post-Investment Oversight

Periodic commercial reporting, stakeholder coordination and owner representation under an agreed scope, particularly where the investor is based outside the UAE or requires an independent local point of contact.

How We Work

K&K can support a focused opportunity review, a broader UAE market-entry mandate or continuing owner representation. The scope is agreed around the client's objectives and delivered in coordination with appropriately licensed brokers and professional advisers.

Scope & Professional Boundaries

K&K provides strategic, commercial and implementation support within an agreed mandate. Where specialist technical, legal, regulatory, financial or licensed professional services are required, these remain with appropriately qualified advisers and delivery partners.

Leadership & Relevant Experience

H.E. Dr. Tayeb Kamali

Co-Founder & Chairman

Dr. Kamali brings long-standing UAE leadership experience across education, applied research, government-related institutions, corporate boards and investment networks. His roles have required the assessment of partnerships, institutional opportunities, technology ventures and long-term strategic initiatives involving both public- and private-sector stakeholders.

His wider board and investment experience gives K&K access to senior-level perspective and relationships across the UAE. Combined with K&K's ownership and operational experience, this supports a disciplined approach to opportunity assessment, partnership building and local execution.

K&K's value is not the promotion of a particular property or product. It is the ability to help an investor navigate the market, ask the right commercial questions and assemble the appropriate licensed team around the opportunity.

Positioning Note

This experience belongs to Dr. Kamali's career across government, education, investment and institutional partnerships. It informs K&K's capability and network; it should not be described as work previously delivered by K&K unless the relevant engagement was contracted through K&K.
